### PROFILE

A front-end web developer who uses a strong attention to detail and complex problem solving skills in order to build intuitive and accessible web applications. With experience working in operations, customer service and leadership roles, I bring the ability to critically evaluate information, make decisions, and work effectively with people. I am looking to explore new opportunities to grow as a person and as a developer.

### PROFESSIONAL EXPERIENCE

#### FRONT END DEVELOPER

McCann Canada | June 2021 – Present

- Develop content using HTML, CSS, and JavaScript/jQuery, within various CMS environments and web applications
- Build and deploy HTML emails using various CRM platforms
- Produce code that is compliant with current accessibility requirements

#### BUILDING MAINTAINER

Angus Facilities Management Limited | Sep 2019 – Nov 2020

- Maintained a safe and comfortable environment by conducting routine site inspections and performing maintenance as required
- Ensured efficiency through the conducting of inspections on HVAC equipment, pumps, generators, uninterruptible power supplies and taking action when necessary
- Provided tenants satisfaction with building repairs including replacement of defective parts, changing light fixtures, etc.

### FEATURED PROJECTS

#### WRITE ON

HTML5 | SCSS | REACT | FIREBASE | TEAM PROGRAMMING

A quiet place for users to develop a writing practice. Features a dark mode, a communal daily writing prompt, and a form for users to submit their own writing prompt. Includes a goal timer and idle timer.

#### MOTIVATION BOARD

HTML5 | SCSS | REACT | FIREBASE | SOLO PROGRAMMING

An app where a user can post a message for others to see, sign their initials, and like posts with all data being saved to firebase.
